## ABSTRACT OF THE DISCLOSURE

A21  
An absorbent article for wear inside of another absorbent article, which has a liquid-permeable facing layer that faces the wearer, a backing layer that faces another absorbent article. The backing layer is formed from a liquid-impermeable sheet and has at least one opening made therein. Alternatively, the backing layer is formed from a liquid-permeable sheet and an absorbent core which is interposed between the facing layer and the backing layer.
